## Writing

### ANSWER SHEET

ID number

A - 29

#### Saint-Petersburg: city of future.

Having territories both on Earth and in the open space Russia nowadays is a mighty empire. There are lots of cities to visit and the first one, of course, is Saint-Petersburg.

##### 1. General ~~infort~~ information.

Saint-Petersburg is a city, where modern aspects of living co-exist with ancient architecture. The air of the city's outstanding history will give you an opportunity to pretend yourself a timetraveller.

##### 2. Places of interest.

There are lots of places to visit in Saint-Petersburg. An Integrated House, which is an integration of a building and virtual reality, will give you a chance to <sup>look</sup> glance at the Russian territories in space, while ancient museums like Hermitage are great places to learn about the past.

##### 3. Ways to travel around.

The most common vehicle now is a "teleporting block". All cars are now obsolete, except flying ones, but these are a bit old-fashioned too. Using a "teleporting block" you can get anywhere you want and you need no roads to do that! The software, which provides the use of "blocks" works only on our planet, so open space is a place you can't visit using it.

##### 4. Food.

Catering is fully provided by home-robots so you don't need to cater yourself. Robots have special "Russian cuisine"-option and can cook traditional dishes such as "borsch" with space-chicken, "pelmeni" with dinosaur meat and other.

##### 5. How to spend your free time?

In spite of having "teleporting blocks" you can still use your

legs to wander around ~~the city~~ beautiful streets. Space shopping is also a good option for those who want to travel on other Russian planets.
